CAREER OBJECTIVES

Entry-level Data Analyst driven by a passion for solving business problems through data-centric insights. I have developed a portfolio of real-world projects demonstrating mastery in Power BI (DAX) and Excel (Power Pivot, Pivot Tables). As a self-motivated professional, I am seeking a remote opportunity to apply my analytical skills, contribute to business challenges, and grow professionally within a forward-thinking data team.

CORE SKILLS

- Data Cleaning & Transformation
- Data Visualization
- SQL Basics
- Data Entry & Data Management
- Attention to Details & Accuracy
- Problem solving
- Microsoft Office Suites

EDUCATIONAL BACKGROUND

Higher National Diploma (HND) - Banking and Finance
Lagos State Polytechnic, Ikorodu.

2022 – 2023

Ordinary National Diploma (OND) – Banking and Finance
Lagos State Polytechnic, Ikorodu

2017 - 2020

PRATICAL EXPERIENCE

Junior Data Analyst/ Data entry

March 2025 – Present

Tripod Global Limited (Self Learning Projects & volunteer Work)

- Enter Data Accurately
- Collected, cleaned, and analyzed data
- Build interactive Power Bi dashboards to visualize KPIs such as sales trends and expense tracking
- Streamlined data entry and cleaning tasks in Power Bi using Dax formulas and Power Query
- Create financial Performance reports for informed decision-making.

CERTIFICATE AND TRAININGS

Quantum Analytics NG

December 2025

Data Analyst Training

Forage

August 2025

Tata - Data Visualizations: Empowering Business with Effective Insights Job Simulation

PROJECTS

Electronic Sales Dashboard

This Dashboard was developed with Power BI to analyze electronics sales, profitability, product performance, regional and time-based trends to provide business stakeholders with insights to make data-driven decisions by tracking key business metrics over time.

Supply Chain Dashboard

This dataset contains supply chain information covering products, SKUs, transportation modes, carriers, pricing, shipping costs, stock levels, and defect rates. The dataset was analyzed to understand supply chain performance, identify cost and efficiency issues, monitor inventory levels, and support better operational and logistics decision-making.

Palmoria-Workforce-Compensation-and-Diversity-Insights

This project provides a granular analysis into the workforce structure of Palmoria. As a Data Analyst, my goal was to evaluate how compensation is distributed across the organization and to identify potential gaps in gender diversity and pay equity.

By analyzing salary, bonuses, and performance ratings, this dashboard serves as a strategic tool for leadership to ensure fair treatment and optimized budget allocation across all regions and departments.

Kultra Mega Stores Shipping Cost and Logistics Analysis

This project presents a comprehensive SQL-based Analysis of sales operations, which focuses on the relationship between shipping cost, order of priority, cost optimization, customer and segment levels sales performances.
